

▶ ADVANCED ERROR DETECTION

PlutoX Advanced Error Detection plays an important role by utilizing advanced clinical editing technology to ensure that both institutional and professional claims are properly coded and compliant with applicable payer/industry requirements.

LESS THAN **1%**
REVERSAL RATE

Our solution contains millions of editing combinations based on commercial, Medicare, OIG and Medicaid policies. The unique editing, reporting, and work flow capabilities in our Advanced Error Detection products deliver significant cost advantages. Highly customizable rules can be created to meet each customer's specialized needs.

We're so confident PlutoX will find significant savings for your organization, we offer a **FREE** analysis on your previously paid claims to demonstrate the unrealized savings potential.

▶ FRAUD WASTE & ABUSE PREVENTION

Utilizing the robust framework powering our Advanced Error Detection platform, we offer an additional FWA program which serves to analyze claim data and identify patterns of wasteful and abusive billing over time. Our comprehensive FWA analysis reports allow our customers to be proactive in preventing future instances of excessive overbilling.
